What makes Our Service different?

Fiber optic technology is among the latest & greatest communications technology out there. Fiber cable is composed of hundreds of strands of glass that can transmit digital information through light signals over long distances.

Blue Lightning Monitoring relies on the Blue Lightning fiber optic network to send your alerts and transmit video signals so that you have a real-time look at what's going on at your home or business over a reliable connection. From converting your existing alarm system, to having a new system professionally installed, we can help!

To top it off, we provide lcoal customer service with simple contracts, and no 800 numbers! We can make sure you have the tools you need to call for help or have a trained staff onduty 24/7.
